Delhi 2010 Commonwealth Games Win for ESG-Arena Group Joint Venture

October 3rd 2010 sees the opening of the Commonwealth Games in Delhi. ESG Arena JV (comprising ES Group and Arena Group), together with local partner dartindia (Spaceworkz Group), have been contracted to provide Games Overlay for 3 competition venues and 18 training venues. The team are responsible for providing the temporary overlay for these facilities including more than 200 temporary structures, a temporary stadium to host the Rugby Sevens, 7,000 capacity seating grandstands, power, media facilities and lighting. The scope of the contract also includes maintenance during the Games and removal of the temporary overlay afterwards.

The local partnership has been set up specifically to deliver this £20million project but the intention is to develop the partnership and to deliver future projects together in India as the desire to deliver bigger and better world class events in India is very apparent. There are many opportunities in the region in the near future including the ICC Cricket World Cup, IPL and Formula 1.

Arena Seating Sales Director Dave Withey comments: "Once again the Arena Group, alongside our partners are proving our ongoing commitment to expanding our operation in to major world events and growing markets.

"The challenge of shipping from Dubai and the UK and installing equipment in difficult circumstances is something we are experts at. Led by Terry Smith our Operations Director and Gary Cripps on site in Delhi the challenge is once again being met."
